

After removing a tree...

Consider Re-foresting the Forest!

Professional Department of Agriculture Foresters, who are familiar with the Blirstone environment, recommend the following trees be planted to maintain the health and appearance of our properties. All are Native to our area and more wind-resistant than, for instance, water oaks.

Here (in no particular order) are trees that will do well in our neighborhood:

Magnolia

Hackberry

Swamp chestnut

Swamp oak

White Oak

Florida Maple

Flowering Dogwood

And, if you have a persistent wet spot in your yard, Cypress!

(When you purchase the tree from the Nursery, you will get planting instructions).

Thank you!

Your Blirstone Forest Board of Directors
